Dear Valued Customer:

Please be informed that due to our Enterprise Resource Planning (ERP) software Microsoft Navision there will be a mismatch between the commercial names of some products and the name in the label our warehouse apply to the same.

This is because when approaching international markets we use different commercial names depending on the country we are dealing with, while maintaining the same technology.

This mismatch do not affect in any way the conformity of the products we are supplying.

As manufacturer of the below mentioned products we hereby confirm that technical specifications of the supply are exactly the same of the ones specified in the offer.

We hope that this will not cause any serious consequences, and we express our sincere apologies for the inconvenience that this mismatch could cause.

Please find the list of CAE products with different commercial/warehouse names:
